ABOUT US

The Offshore Wind Innovation Hub is the UK's primary coordinator of innovation, focusing on offshore wind energy cost reduction and maximising UK economic impact.

Funded by the Department for Business, Energy and Industrial Strategy (BEIS) and delivered jointly by the Offshore Renewable Energy (ORE) Catapult and the Knowledge Transfer Network (KTN), the Hub presents UK offshore wind innovation priorities, supply chain growth opportunities and a comprehensive view of the funding landscape.

The Hub is actively engaging with industry, academia, other research organisations and the public sector to identify the innovation priorities for offshore wind in the UK. These priorities will be developed into a technology innovation roadmap, identifying the natural owners of the technology and know-how to tackle these challenges, and working with them to link up investment, development support and open up routes to market.

The Hub will also facilitate building consortia to meet these challenges. It will undertake brokering and convening activities to foster collaboration and enable partnerships to be formed between companies within the sector, and encourage cross-sector technology transfer through its Offshore Wind Innovation Exchange Programme.

Chris Hill
Director

GUIDING PRINCIPLES

Constantly striving to be:

To be evidence-based and objective in its activities and recommendations

To encourage activities and convene project consortia without preference for any particular organisation

To deliver reliable, valid, accurate and responsible information that can be trusted by the private and public sector

COORDINATING UK OFFSHORE WIND INNOVATION

OUR MISSION

Under the direction of the Hub's Technical Advisory Group, which includes senior technology leaders from all parts of the UK offshore wind supply chain, the Hub is:

- Consulting industry to define the sector's innovation priorities;
- Convening industry to respond to funding calls most effectively;
- Promoting the industry's priorities and successes through domestic and international platforms;
- Informing government of sector priorities
