FIT 4 OFFSHORE RENEWABLES: BUSINESS IMPROVEMENT SUPPORT FOR NORTH EAST SCOTLAND COMPANIES

ORE Catapult's Fit 4 Offshore Renewables (F4OR) North East Scotland programme, delivered in partnership with Opportunity North East, has been designed to support the development of an increasingly competent, capable and competitive UK supply chain - maximising opportunities, both domestically and globally.

The North East of Scotland is uniquely positioned to take advantage of the massive opportunity presented by offshore wind. The programme, which has been developed with input from the offshore renewable energy industry, will help accelerate the pace of diversification of the energy supply chain in the region.

Delivery partners

F4OR OVERVIEW

- // Business process and sector specific competence improvement and assessment programme
- // Assessing and developing core business processes and capability to meet offshore wind sector requirements
- // 12-18 month programme, aimed at established companies who have scope to grow significantly in offshore renewables markets
- // F4OR targeting 'high potential' new or recent entrants to the sector
